RIGHTS HELD: WORLD

**A forgotten gem from the 1920s.**

**Humanity has defeated hunger - or so it seems.**

Golden times seem to be dawning for mankind, life in big cities is comfortable and now, with artificial food, hunger has been defeated. But in 19530 the researcher Henrik makes a discovery that makes him doubt this utopia. Although nobody wants to hear his doubts. Not even when inexplicable fires threaten the cities.

Annie Francé-Harrar's novel, published in 1920, reads like a contemporary warning not to close one's eyes to environmental exploitation.

**ANNIE FRANCÉ-HARRAR** (\* December 2, 1886 in Munich; † January 23, 1971 in Hallein, Austria) was an Austrian biologist and writer. Francé-Harrar and her second husband Raoul Heinrich Francé created the scientific basis for the humus and compost industry, which she developed independently after his death in 1943. In the course of her life she wrote 47 books, about 5000 articles in the German-language press and held over 500 lectures and talks, including a great number of radio broadcasts.
